Dube TradePort's AgriZone has an Indigenous Nursery with a variety of indigenous plants for your garden. You can help by contributing towards overcoming South Africa's critical shortage of water, by planting indigenous vegetation in your garden. There are many benefits to using indigenous plants for gardening because these plants are hardier and conducive to cope with the dry local conditions.

Indigenous stay evergreen and attract a variety of birds and wildlife to your garden giving you a fulfilling experience, from your window.

Take a look at the wide range of species you can choose from:
